

DEEPANSHU SHARMA

IT & Cybersecurity Enthusiast

📞 9310142140

✉ deep1209anshu@gmail.com

📍 Delhi, India

🌐 <https://github.com/Deepanshu12344>

PROFILE SUMMARY

Computer Science graduate with a strong foundation in Linux, Networking, Python and Cybersecurity fundamentals. Hands-on experience in security labs using TryHackMe, network analysis with Wireshark. Passionate about software development, cloud technologies, and information security, with a strong willingness to learn and contribute in a fast-paced IT environment.

KEY SKILLS

Cybersecurity Fundamentals Network Security Computer Networks Problem Solving Continuous Learning

TECHNICAL SKILLS

Git Splunk SIEM C, Python (basic scripting) Wireshark, tcpdump Networking Log Analysis Socket Programming

Docker AWS (Basic) SQL Incident Investigation

EDUCATION

- MotherDivine Public School , Rohini Sector-3, New Delhi, Delhi, India 2020
SSC | CBSE | **Percentage: 79.4**
- Mother Divine Public School , Rohini Sector-3, New Delhi, Delhi, India 2022
HSC | CBSE | **Percentage: 82.6**
- Dr. Vishwanath Karad MIT World Peace University (MIT-WPU) , Pune, Maharashtra, India 2022 - 2026
Bachelor of Technology in Computer Science Engineering | **CGPA: 7.82**

PROJECTS

● AI-Based Secure CI/CD Pipeline with Risk Scoring

Github Actions Docker Python MongoDB Machine Learning

Developed an enterprise DevSecOps platform using Python, React, Node.js, Docker, and GitHub Actions to automate security scanning, vulnerability risk assessment, and secure CI/CD workflows with real-time monitoring. Integrated an ML-based risk scoring engine to detect vulnerabilities and automatically block high-risk builds, improving software security throughout the development lifecycle.

● SentinelX — Automated Malware Analysis & Threat Intelligence Platform

Sandbox integration VirusTotal API Supabase

Developed a full-stack malware triage platform using React, TypeScript, Supabase, and CAPE/Cuckoo Sandbox to automate malware analysis and enrich results with VirusTotal threat intelligence. Built a background worker to process sandbox reports, store findings in PostgreSQL, and provide analysts with a real-time dashboard for behavioral analysis and malware verdicts.

Multithreaded HTTP Proxy Server with Caching

POSIX Threads

Sockets Programming

Developed a multithreaded HTTP proxy server in C using POSIX threads and socket programming to handle multiple concurrent client requests efficiently. Implemented an LRU-based in-memory caching mechanism, custom HTTP request parsing, and thread synchronization to improve response times while ensuring safe concurrent execution.

ACHIEVEMENTS AND AWARDS

Received 1st prize in team project category at CSI (Computer Society of India), Mumbai

PERSONAL INFORMATION

DOB: Sep 12, 2004

Gender: Male

Residential Address: Delhi, India

Spoken Languages: English, Hindi
